

SOFTWARE DEVELOPERS (Saskatoon)

Build your Career with Vecima Networks!

It is estimated that 60% of the world's cable-based internet traffic passes through Vecima Products.

Join us and help develop the Next Generation of Cable TV and Wireless Broadband Technology.

Become part of a Research and Development team that values creativity and innovation.

Vecima Networks, Inc. (TSE: VCM) is seeking talented Software Developers in order to meet the growing demand for world class products for the data-over-cable, digital video, and wireless broadband industries.

These positions are located in our main Research and Development center in Saskatoon, Saskatchewan.

Applicants should possess the following skills:

- Networking protocol implementation and analysis
- High level software architecture and design
- Software testing methods and automation
- Userland C programming in a Linux/Unix environment
- Excellent verbal and written communication

Background in any of the following areas, while not required, would also be an asset:

- Embedded software development
 - BSD or Linux kernel development
 - Developing Linux device drivers and/or applications
 - Embedded web/software development
 - C/C++ or Assembler programming
 - TCP/IP, UDP/IP, SNMP, HTTP, and other networking protocols
- Project management, systems design, technical project team leadership
- Experience with MPEG, DOCSIS, DVB, or 802.16 standards
- Software estimation
- Software Configuration Management (SCM) tools and practices

Vecima Networks Inc. has a competitive compensation and benefits package, and strives to provide a challenging work environment that can foster skill development and personal career growth for all employees.

If you are looking for a challenging career move as a Software Developer, we want to hear from you! To apply, please direct your cover letter and resume, including salary expectations, to the contact below.
