VistaMAX 3.65 GHz Last-Mile, Simplified

Vecima enables premium last-mile broadband connectivity with its VistaMAX series of WiMAX base stations, outdoor and indoor CPEs and sophisticated network management tools. Commercially deployed at 3.5 and 1.9 GHz, VistaMAX is now available at 3.65 GHz. Find out more on how Vecima can help you lay the foundation for rapid deployment by visiting www.vecima.com.

Connecting to the World

Bringing broadband to rural areas has never been easier

Every community deserves to benefit from broadband access. The VistaMAX 3.65 GHz system enables Wireless Internet Service Providers and Telcos to offer their customers premium wireless broadband access at affordable prices in areas where broadband access was not previously available.

Key Features

Time Division Duplexing (TDD)
